

From Sunrider Face Book Post 8/31/11

Product Information: Sunectar® is a concentrated raw extract of stevia, while SunnyDew® is a purified extract concentrate of stevia. Compared with Sunectar®, SunnyDew® has a lighter color and a higher concentration of the sweet-tasting component of the stevia plant. SunnyDew® & Sunectar®

The primary ingredient of both these dietary supplements is stevia, an herb indigenous to South America. The natural extract from stevia leaves helps maintain normal blood sugar levels and is an excellent dietary supplement.* Better yet, our stevia extract contains no calories. Stevia has been used by South Americans and Asians for centuries as a sweetener and as a dietary supplement. Stevia enhances the flavor of food and beverages and supports a healthy diet and lifestyle

- All-natural flavor enhancers, with no aftertaste.
- Made with a special extraction and concentration process.
- Highly concentrated: a few drops transform water into a flavorful drink.
- Easy to carry and a great introductory product.

* These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

Stevia and Sunrider:

Sunrider is an early innovator in the manufacturing and marketing of products that contain stevia and has helped popularize its use in many countries. In April 1995, Sunrider successfully petitioned the Food and Drug Administration (FDA) to lift the import alert on the extract of stevia leaves, thereby clearing the way for the use of stevia as a dietary supplement in the United States.

Recommendation: Add drops as desired to supplement food or drink
