

Advanced Skin Care

Dr. Chen®

Youth Emulsion

and

Dr. Chen®

Youth Masque

Based on cutting-edge DNA research, Dr. Chen® Youth Emulsion uses stem cells derived from rare Swiss apples and French grapes to repair your skin's appearance. Combine it with our ultra-hydrating Dr. Chen® Youth Masque, another advanced skin care treatment, to help your skin look years younger

A BEAUTIFUL BREAKTHROUGH IN SKIN CARE!

Oi-Lin® Youth Emulsion represents the next generation of Sunrider's age-defying skin care line. Key ingredients in this breakthrough treatment combine to combat the chronological signs of aging and promote a revitalized, glowing complexion. Inspired by DNA research, this formula features stem cells derived from a rare Swiss apple and a French grape to help restore and maintain youthful-looking skin.

Dr. Chen® Youth Masque delivers potent hydrators derived from herbal botanicals to the upper layers of the epidermis. We use "hero ingredients" such as salicylic acid, a gentle natural exfoliant, and barley, which has exceptional moisturizing properties. It leaves skin feeling supple and soft while locking in moisture. All of these factors combine to dramatically reduce the appearance of fine lines and wrinkles.
