FAQS

Q: What are T-cells?

A: T-cells are white blood cells that find and fight germs and infections in our bodies. They are an important part of our immune systems.

Q: What does the immune system do?

A: Our immune systems fight illnesses, infections, germs, and parasites by trying to get rid of any unfamiliar cells in our bodies.

Q: What is the wood element?

A: The wood element is tied most closely to the liver, and drives ambition, courage, and resourcefulness in your life. When it's out of balance, you can become aggressive and impulsive.
